PREFACE

"Full many a gem of purest ray serene
the dark unfathomed caves of ocean bear
Full many a flower is born to blush unseen
and waste its fragrance on the desert air"
- Keats

Similar is the situation of many statistical data lying unnoticed in many unwieldy tomes brought out from time to time. Often, the data-user would wish that the data required by him were available in one compendium. This volume is an effort towards that object.

"I am easily satisfied with the very best", is a sentiment said to have been expressed by Winston Churchill, which we know, would be endorsed by the data user when it comes to the quality of a reference compendium and hence that has been constantly kept in mind while bringing out this compilation.

This Handbook attempts to present in one convenient volume the basic data on administrative units and the key population statistics obtained through manual tabulation of the 1991 Census data relating to all the districts of India. Data on area, number of tahsils, number of community development blocks, number of towns including statutory towns & census towns, number of villages both inhabited & uninhabited, number of households, population and various population indicators like annual exponential growth rate, density of population per square km., sex ratio, proportion of scheduled caste & scheduled tribe population, proportion of urban population, work participation rates and percentage of main workers in the primary, secondary and tertiary sectors have been presented in this Handbook.

K.S. Natarajan, then Deputy Registrar General, assiduously looked after the initial work relating to the preparation of data for this publication assisted by Anand Kumar, Deputy Director of Census Operations and P. K. Sreedharan, Research Officer. It was then carried forward by S.K. Sinha, Deputy Registrar General. A.K. Singh, Deputy Director of Census Operations, looked after the scrutiny and checking of the data. The Map Division prepared the maps. The work relating to compilation and preparation of camera ready copy was done by H.K. Kaushal, Investigator. S. P. Sharma, Deputy Registrar General, diligently attended to the finalisation, lay-out and printing of this publication.

I hope this publication will come in handy for a wide spectrum of data users like administrators, policy-makers, planners, demographers and research scholars as reference handbook.

2A, Man Singh Road
New Delhi - 110 011
May 1996

Dr. M. Vijayanunni
Registrar General &
Census Commissioner, India

Explanatory notes on the terms used

- 1. Area:** The area figures (in sq. km.) are as supplied by the Central Statistical Organisation.
- 2. Number of Tahsils :** This column gives the administrative unit below the district. In some states these are termed as tahsils, in some others as taluk, circle, sub division etc. The nomenclature used in each state has been indicated in the title of the corresponding column.
- 3. Community Development Blocks:** In some states the Community Development Blocks are co-terminus with tahsils. In some others they cut across tahsils. In some states a tahsil includes a number of C.D. Blocks.
- 4. Number of Towns:**
 - a) Statutory Towns:** These are places with a municipality, corporation or cantonment board or notified town area.
 - b) Census Towns:** Prior to each census, the census office examines the list of villages and classifies some villages as census towns. All villages which satisfy the following criteria are classified as census towns:
 - i - A minimum population of 5,000;
 - ii - At least 75% of the male main workers engaged in non- agricultural pursuits;
 - iii - Population density of at least 400 persons per square km.
- 5. Households:** Household is defined as a group of persons who commonly live together and take their meals from a common kitchen, unless the exigencies of work prevented any of them from doing so. A household may comprise of persons related by blood or unrelated persons or a mix of both. Examples of households of unrelated persons are hostels, residential hotels, rescue homes, jails, ashrams etc. These are called "Institutional Households."
- 6. Population:** Population figures are as per the 1991 census which was conducted with the sunrise of 1 march, 1991 as reference point of time. No census was conducted in the State of Jammu & Kashmir in 1991 due to the disturbed conditions prevailing there. The projected population has been shown for Jammu & Kashmir.
- 7. Annual exponential growth rate:** gives the continuous growth of population during the time interval under reference with compounding done at each instant. It is calculated from the following equation:
$$r = \frac{\ln (P_{91}/P_{81})}{10}$$
where \ln is the natural logarithm and P_{91} & P_{81} denote the population as per the 1991 and 1981 census respectively.
- 8. Density:** Density is the number of persons per sq. km.
- 9. Female sex ratio:** Female sex ratio is the number of females per thousand males.
- 10. Urban population:** This is the proportions of population living in the urban areas to the total population.
- 11. Literacy rate:** A person who can read and write with understanding in any language is taken as literate for the purposes of census. Literacy rate is defined as the percent of literate persons in the age group 7 and above, to population in ages 7 and above. In the 1991 census, by definition all children below the age of 7 were considered as illiterate.

12. Work participation rate: Census classifies every person as a main worker, marginal worker or non-worker. If a person had worked for major part (i.e. more than 183 days) of the year preceding the date of census enumeration, he/she was considered as a main worker. If a person had worked for some time but not for the major part of the last year, he/she was termed as a marginal worker. All others were classified as non workers. Work participation rate is the proportion of main workers plus marginal workers to the total population.

13. Primary, Secondary and Tertiary Sectors: Based on the nature of economic activity in which a person was engaged, all main workers have been classified into nine industrial categories as under:

- I) Cultivators;
- II) Agricultural labourers;
- III) Workers in livestock, forestry, fishing, hunting and plantations, orchards and allied activities;
- IV) Workers in mining and quarrying;
- V) Workers in manufacturing, processing, servicing and repairs
 - (a) in household industry
 - (b) in other than household industry;
- VI) Workers in construction;
- VII) Workers in trade and commerce;
- VIII) Workers in transport, storage and communications; and
- IX) Workers in other services

The workers in the above industrial categories have been grouped under Primary, Secondary and Tertiary sectors. Primary sector consists of industrial categories I, II, III, & IV. Secondary sector consists of industrial categories V(a), V(b) & VI i.e. manufacturing, processing, servicing and repairs and construction. Tertiary sector consists of industrial categories VII, VIII & IX i.e. trade and commerce; transport; storage and communications and other services. The proportions presented are main workers in primary sector, secondary sector and tertiary sector to total main workers.

@ The 1991 Census was not held in Jammu & Kashmir due to disturbed conditions.

\$ The population figures for Jammu & Kashmir are as projected by the Standing Committee of Experts on Population Projections.

+ The area figure for India is 3,287,263 sq. km. which includes 78,114 sq. km. under the illegal occupation of Pakistan and 5,180 sq. km. illegally handed over by Pakistan to China and 37,555 sq. km. under illegal occupation of China.
